

Thanks for purchasing this Twin Power® product. At Twin Power® we strive to offer you the best performance products at reasonable prices. If we won't run it on our own rides, we won't sell it to you.

PART # 482038

## 1998 & LATER BIG TWIN AND TWIN CAM EXTRA PLATE KIT

KIT CONSISTS OF 10 FRICTION PLATES, 9 STEELS, AND DIAPHRAGM SPRING

This kit includes a 10% stronger than stock diaphragm spring. Plates should be pre-soaked in the same fluid you will be using in the bike for about 10-15 minutes prior to installation. The type of fluids we recommend are Twin Power® Primary Lubricant (p/n 539018), or any HD petroleum based, non-synthetic, primary oil, as light weight as possible. **THE USE OF SYNTHETICS IS NOT RECOMMENDED AS THEY TEND TO CAUSE SLIPPAGE.**

Start with a friction plate and end with a friction plate. The OEM clutch will have 1 odd friction plate that will have a larger inside diameter to accommodate a judder spring and seat that will fit inside that 1 odd plate. Remove all those pieces, as you will **NOT** use them with this kit. This means all friction and steel plates. This kit has a premeasured stack height, so everything must be used. Do **NOT** mix the old and new plates together.

These are just some helpful tips. For further technical assistance *refer to your service manual.*
