

K&N Filtercharger® P/N E-3226

This filter fits: **Teardrop filter housing used on S&S Super E & G carburetors**

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter will last for many years. This filter is a replacement for the stock foam filter element, but the base plate will have to be modified slightly to allow a proper fit. The following procedure **MUST** be followed to ensure a proper fit and seal of the K&N Filtercharger®.

- 1) Remove the baseplate from the carburetor.
- 2) There is a small ear on the base plate that must be removed for the filter to seal properly. Use a die-grinder or a file. (see fig. 1)
- 3) Re-install the base plate onto the carburetor.
- 4) Grease both sealing surfaces of the filter, and fit it up to the baseplate.
- 5) Install the cover onto the base plate, be certain that the filter is seated properly before tightening the cover screws.
