308028	1 Instruction Sheet

TOOLS SUGGESTED

9/16" Combination and Socket wrenches, 1/4", 3/16" Allen wrenches, #2 Phillips screwdriver or Tapered punch

PROCEDURE AVERAGE TIME: 5 MINUTES

STEP 1 Remove the existing footrests from the motorcycle. NORMALLY, the pegs are secured with a 3/8" x 1-1/2" Hex bolt requiring 9/16" wrenches.

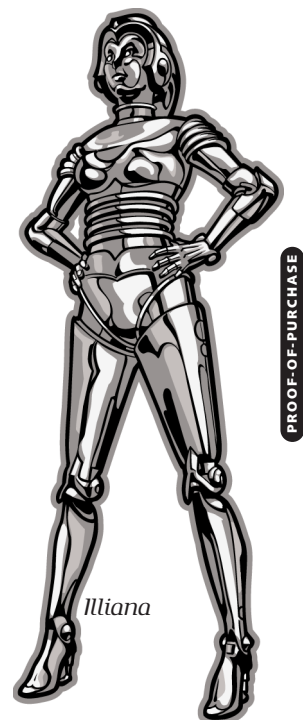

STEP 2 The normal orientation of the pegs is with the row of four ISO-Pads towards the front of the bike.

STEP 3 Place the Dually footpeg and the stock D-washer in the mounting clevis so all holes line up. A #2 Phillips screwdriver or tapered punch is helpful for hole alignment.

STEP 4 Replace the mounting (pivot) bolt and nut and tighten securely.

STEP 5 The attitude of the footpeg may be adjusted by loosening the socket heat bolt on the outside of the peg (See PIC.1) with a 1/4" Allen wrench, rotating the peg to your desired angle, and re-tightening the bolt.

Ride On!
